# Subject index for Volume 15

Abruptio placentae 290–7
Accuracy of mortality rates 306–14
Age of mother *see* Maternal age
Air pollution – and SIDS 179–80
Alcohol intake *see* Maternal alcohol
Aldehyde dehydrogenase Suppl. 2: 65, 70
Alpha-fetoprotein Suppl. 2: 136–58
ALSPAC study methodology 74–87
Amniocentesis Suppl. 2: 48
Anaemia *see* Maternal anaemia
Anaesthesia during delivery 328–37
  *see also* Epidural
Anencephaly 106
Antenatal care *see* Prenatal care
Antibiotics and preterm delivery Suppl. 2: 50–1
  in childhood 61–7
Anticonvulsants Suppl. 1: 18
Antihypertensive drugs Suppl. 1: 16–18
Antiplatelet agents Suppl. 1: 15
Anxiety *see* Maternal anxiety
Apgar
  and induction of labour 131–9
  and neuroblastoma 47–53
Apnoea 178, 182–3, 252–6
Arcuate nucleus 186
Artificial neural network Suppl. 2: 85
Aspirin *see* Antiplatelet agents
Atrial stretch reflex 184
Authorship 207

Bacterial toxins – and SIDS 162–3
  vaginosis Suppl. 2: 81–2, 104–23
Bacteriuria Suppl. 2: 49–50
Bacteroides 56
Barometric pressure 287–9
Bed rest Suppl. 1: 16
Bed sharing – and SIDS 158–60
Bedding – and SIDS 152–5
Beta-endorphins Suppl. 2: 146
Biased report 140–3
Birth defects *see* Congenital defects
Birthweight
  and bone mineralisation 211–19
  and cerebral palsy 359–64
  and gene interaction 211–19
  and infant mortality rate 12–18
  and maternal age 19–26, 259
  and maternal smoking 19–26, 257–64
  and mortality 220–5
  and neonatal admission 102–3
  and neuroblastoma 328–37
  and SIDS 148
  and social deprivation 19–26
  of twins by mortality 346–51
Black vs. white differences
  in outcome of bleeding 34–9
Bleeding, vaginal
  and neuroblastoma 328–37
  and pregnancy outcome 34–9
  and preterm 110–22
Bone mineralisation 211–19
Brainstem 185
Breast feeding
  and jaundice 352–8
  and SIDS 166–8
  duration, time trends in 4–11

Caesarean section 131–9
  and low birthweight 257–64
  and maternal morbidity 232–40, 241–2
  and neuroblastoma 328–37
Caffeine *see* Maternal caffeine
Calcium supplements Suppl. 1: 15
Cancer, childhood 47–53, 328–37, 338–45
Candida infection 56

Candidate genes – for preterm delivery Suppl. 2: 58–61, 63–77
Carbon monoxide 179
Carotid body chemoreceptors 184
Catecholamines Suppl. 2: 146
Cerebral palsy 201, 271–7, 278–86, 359–63
Cervical incompetence Suppl. 2: 44
Chickenpox 328–37
Chlamydia Suppl. 1: 24, Suppl. 2: 43
Chorioamnionitis Suppl. 2: 44–7, 65–6, 78–89
Chromosome anomalies – and social deprivation 364–73
Cleft lip/palate 107
Collagen genes 211–19
Colony-stimulating factor Suppl. 2: 78–9
Communication 320–2
Congenital defects
  and preterm delivery 106–9
  mortality from 364–73, 374–8
Coping Suppl. 2: 32–3
Corticotropin-releasing hormone Suppl. 2: 63–77, 104–23, 124–35, 136–58
Cortisol Suppl. 2: 146
Cot mattress 180–82
Cotinine – and maternal smoking 140–3
CPAP and cerebral palsy 271–7
Cytochrome P450 genes Suppl. 2: 65, 68–70
Cytokines – and preterm delivery Suppl. 2: 23, 59–61

Danish National Birth Cohort Suppl. 2: 90–103
Delivery, type of – and maternal morbidity 232–40
Depression *see* Maternal depression
Deprivation *see* Social deprivation
Diaphragm 185
Disability 359–63
Dummy *see* Pacifier
Dutch famine 220–5

E. coli infection 56
Education level *see* Maternal education, Paternal education
Endocrine disrupter 202
Epidural anaesthesia 131–9, 328–37
Epoxide hydrolase Suppl. 2: 65, 70
Estriol Suppl. 2: 78–89
Ethnic group
  and jaundice 352–8
  and SIDS 147
Experimental philosophy 2–3

Family resources – and preterm delivery 110–22
Fibronectin, fetal Suppl. 2: 78–89, 104–23, 136–58
Fish oil supplements Suppl. 1: 15
Folate Suppl. 2: 104–23

Gene–environment interactions 211–19, 317–18, Suppl. 2: 67–8, 104–23
Genetic predisposition to preterm delivery Suppl. 2: 57–62
  susceptibility to environmental toxins Suppl. 2: 67–8
Geographic variation – with leukaemia 338–45
Glutathione-S-transferase genes Suppl. 2: 65, 67, 70
Gonorrhoea Suppl. 1: 23–4
Granulocyte colony-stimulating factor Suppl. 2: 136–58

Haemophilus influenzae 56
Haemorrhage, obstetric Suppl. 1: 9–10, 28–32
Height *see* Maternal height
Hepatitis, maternal 328–37, Suppl. 1: 27
HIV infection
  and blood transfusion 68–73
  and obstetric care Suppl. 1: 25–6
Homocysteine Suppl. 2: 104–23
Hospitalisation *see* Neonatal admission, Maternal admission
Host susceptibility Suppl. 2: 31–2
HPA axis Suppl. 2: 65–6, 78–89
Hyperhomocysteinaemia Suppl. 2: 67
Hypertensive disorders of pregnancy 220–5, Suppl. 1: 12–18, 29–31
  *see* also Maternal hypertension, Pre-eclampsia
Hyperthermia – and SIDS 155–6

IGFBP-1 Suppl. 2: 78–89
IL-1 gene Suppl. 2: 63–77, 90–103
IL-6 Suppl. 2: 60, 63–77, 78–89, 90–103
IL-8 Suppl. 2: 78–89
IL-10 Suppl. 2: 90–103
IL-10 gene Suppl. 2: 60–1
Immunisations *see* Vaccinations
Induction of labour 131–9
Infant deaths
  and maternal age at marriage 27–33
  cause of death Suppl. 2: 8
  due to congenital defects 364–73
  mortality rate
    by birthweight 12–18
    in twins 12–18, 346–51
    in triplets 346–51
    time trends in 4–11, 12–18
Infection, infant – and SIDS 161–6
  intrauterine Suppl. 2: 42–3
  maternal *see* Maternal infection
Infertility – and abruption 290–7
Information technology 2–3
Intensive care 208–10
Interventions, prenatal Suppl. 1: 28–33
Iron – and SIDS 187

Jaundice, neonatal 352–8

Labour, onset of Suppl. 2: 41
Laryngeal chemoreceptors 184
Life events Suppl. 2: 35
Listeria 56
Locus of control 113–19
Long QT syndrome 186–7

March of Dimes Suppl. 2: 1–2
Marital age *see* Maternal age at marriage
Marital status
  and pre-eclampsia 40–6
  and preterm delivery 123–30
Mastery 113–19
Maternal admission in pregnancy 323–7
  age
    and abruption 290–7
    and neonatal admission 103
    and perinatal mortality rate in twins 298–305
    and pre-eclampsia 40–6
    and preterm delivery 123–30
    and SIDS 144–200
    at marriage
      and chronic disease 27–33
      and pregnancy outcome 27–33
  alcohol
    and neuroblastoma 47–53
    and SIDS 169
  anaemia
    and neuroblastoma 328–37
    and prenatal care Suppl. 1: 10–12, 29–30
    and SIDS 178
    hospital admission for 323–7
  anxiety – and preterm delivery 114–16
  caffeine – and SIDS 169–70
  depression – and preterm delivery 114–16
  diabetes 328–37
  education
    and abruption 290–7
    and neuroblastoma 47–53
    and pre-eclampsia 40–6
    and preterm delivery 123–30

height
and birthweight 257–64
time trends 4–11
hypertension
hospital admission for 323–7
and neuroblastoma 328–37
and preterm delivery 123–30
infection
and hospital admissions for 323–7
and neonatal death 54–60
and neuroblastoma 328–37
and prenatal care Suppl. 1: 21–6, 28–32
and preterm delivery Suppl. 2: 17–29
and SIDS 166
and stillbirth 54–60
mortality Suppl. 1: 26–7
nausea 328–37
nutrition 220–5
smoking
accuracy of maternal report 140–3
and abruption 290–7
and birthweight 19–26
and neuroblastoma 47–53
and pre-eclampsia 40–6
and SIDS 170–7
maternal age interaction 19–26
time trends in 7
weight
and pre-eclampsia 40–6
time trends in 4–11
weight gain
and preterm delivery 123–30
time trends in 7
Matrix metalloproteinase Suppl. 2: 78–89
Measles 328–37
Medication in childhood 61–7
Methylenetereahydrofolate reductase Suppl. 2: 63–77, 104, 123
Miscarriage
and maternal age at marriage 27–33
Modified Duffy model Suppl. 2: 13–14
Mononucleosis 328–37
Mortality *see* Perinatal mortality, Maternal mortality, Infant mortality
Mother only Method 317–18
Mumps 328–37
Mycoplasma Suppl. 2: 43–5

*N*-acetyltransferase Suppl. 2: 65, 70
Nappy steriliser 182
Neonatal admission 100–5, 131–9, 352–8
length of stay 252–6
deaths – in twins 346–51
Neural–endocrine–immune interactions Suppl. 2: 23
Neuroblastoma
and perinatal factors 47–53, 328–37
and pregnancy history 328–37
Neuroendocrine processes Suppl. 2: 21–2
Nicotine – and SIDS 178–9
Non-stress test 265–70

Obstructed labour Suppl. 1: 18–21, 28–33
Occupation, maternal
and pre-eclampsia 40–6
Oestriol *see* Estriol
Osteoporosis, programming of 211–19
Otitis media
and use of antibiotics 61–7

Pacifer – and SIDS 168–9
Parity
and abruption 290–7
and jaundice 352–8
and neonatal admission 103
and neuroblastoma 47–53, 328–37
and perinatal mortality rate in twins 298–305
and pre-eclampsia 40–6, 220–5
and SIDS 146
Past obstetric history
and neonatal admission 103
and neuroblastoma 50, 328–37
Paternal age
and neuroblastoma 47–53
education
and neuroblastoma 47–53
Perinatal death
and abruption 290–7
mortality rate
accuracy of 306–14
in twins 298–305
time trends in 4–11
Personality Suppl. 2: 32
Phototherapy – and induction of labour 131–9
Physical work Suppl. 2: 36
Placental complications 123–30
pathology Suppl. 2: 136–58
Postpartum morbidity 232–40, 241–2
Post-term
and fetal death 265–70
and neuroblastoma 47–53
POUCH Study Suppl. 2: 136–58
Poverty Suppl. 2: 34
Pre-eclampsia (*see also* Hypertensive disorders)
